

EDWARD YI

New York, NY ◇ 408-890-9117 ◇ edward.dt.yi@gmail.com ◇ Portfolio ◇ LinkedIn

High-performing IT specialist with a background supporting 300+ users across mission-critical and security-sensitive environments, including the U.S. Marine Corps and U.S. Department of Justice. Expert in ITSM workflows, Active Directory, and hardware lifecycle management. Proven track record of reducing downtime and enhancing user trust and confidence through empathetic, clear communication and a relentless focus on security and operational excellence.

WORK EXPERIENCE

United States Marine Corps (USMC)

Okinawa, JP

Help Desk Operations Manager | Network Systems Administrator

March 2018 – June 2022

- Managed and operated an **IT Help Desk** supporting **300+ employees**, completing **400+ annual service requests** using BMC Remedy IT Service Management (ITSM)
- Provided **on-site and remote technical support** for Windows hardware, software, and network issues, resolving **100+ ad-hoc IT issues** with minimal downtime and exceptional customer service
- Architected, organized, and maintained **30 Active Directory security groups** enforcing access privileges, achieving 99% compliance with data security and system protocols for 300+ user accounts
- Facilitated a company-wide hardware and workstation transition (from Lenovo to Dell assets) **valued over 70 thousand dollars**, improving operational efficiency and productivity by more than 30%
- Built, tested, and maintained **Cat 5e/6 network cabling** for all active workstations, ensuring reliable LAN connectivity
- Created and maintained knowledge base (KB) documentation for IT support procedures, SaaS applications, and common system issues, improving ticket resolution across Tier 1 and Tier 2 help desk operations
- Mentored and evaluated 10+ junior team members, providing coaching, performance feedback, and delivered clear technical guidance to non-technical leadership

U.S. Department of Justice

New York, NY

FBI NY Cyber Branch | Student Workforce Trainee

June 2025 - August 2025

- Redesigned the user interface and information architecture of the Computer Analysis and Response Team's Resource Wiki Database, optimizing navigation and search pathways to accelerate resource lookup for analysts
- Developed a **Network Anomaly Detection Machine Learning model** using the Random Forest algorithm to identify malicious network traffic with **99.99% accuracy**, translating model outputs for both technical and non-technical audiences
- Delivered a department-wide technical presentation on the ML model to a **cross-disciplinary audience**, using data visualizations to explain LLM and model-behavior and support operational discussions and future applications
